**DETAILED ACTION*****Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-49 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-17, 21-38, 41-48, 51-58 and 61 of copending Application No. 10/878,342. Although the conflicting claims are not identical, they are not patentably distinct from each other because of their wording variations. The corresponding of claims are as followed:

Claims 1 and 18 of copending Application No. 10/878,342 to claim 1 of instant application;

Claims 2-17 of copending Application No. 10/878,342 to claims 2-17 of instant application, respectively;

Claims 21 and 38 of copending Application No. 10/878,342 to claim 18 of instant application;

Claims 22-37 of copending Application No. 10/878,342 to claims 19-34 of instant application, respectively;

Claims 41 and 48 of copending Application No. 10/878,342 to claim 35 of instant application;

Claims 42-47 of copending Application No. 10/878,342 to claims 36-41 of instant application, respectively;

Claims 51 and 58 of copending Application No. 10/878,342 to claim 42 of instant application;

Claims 52-57 of copending Application No. 10/878,342 to claims 43-48 of instant application, respectively; and

Claim 61 of copending Application No. 10/878,342 to claim 49 of instant application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

3. Claims 1-6, 8-14, 18-22, 25-32, and 49 are also provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-6, 14-20, 24-28, 37-44, and 45 of copending Application No. 10/849,153.

Although the conflicting claims are not identical, they are not patentably distinct from each other because of their wording variations. The corresponding of claims are as followed:

Claims 1-6 of copending Application No. 10/849,153 to claims 1-6 of instant application, respectively;

Claims 14-20 of copending Application No. 10/849,153 to claims 8-14 of instant application, respectively;

Claims 24-28 of copending Application No. 10/849,153 to claims 18-22 of instant application, respectively;

Claims 37-44 of copending Application No. 10/849,153 to claims 25-32 of instant application, respectively;

Claim 45 of copending Application No. 10/849,153 to claim 49 of instant application, respectively;

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
